

MONICA ARAUJO - ENGLISH FOR SPECIFIC PURPOSES

Homework Class 22: Hospital Lighting & Intensifiers

Part 1: Technical Vocabulary

Choose the correct word to complete the technical description:

01. The nurse requested a **(fixture / furniture)** for the wall to hold the new medical monitor.
02. During the surgery, we noticed a slight **(flicker / glare)** in the main light; we need to check the wiring.
03. To improve patient comfort, we installed a **(dimmer / motion sensor)** in every private room so they can adjust the light.
04. The **(lighting / lightning)** in the corridor is too warm; we should switch to cool LEDs.
05. We use **(emergency / circadian)** lighting to help patients maintain a natural sleep cycle in windowless rooms.

Part 2: Adverbs of Intensity

Rewrite the sentences using the adverb in parentheses to change the intensity:

01. The new LED system is brighter than the old one. **(Significantly)**

02. The emergency lights are visible during the day. **(Barely)**

03. The light in the laboratory is warm. **(Slightly)**

04. The operating room must be bright. **(Extremely)**

05. This hallway is dark compared to the entrance. **(Relatively)**

Part 3: Translation Challenge

Translate the following technical requirements to English, using the vocabulary and intensifiers from Class 22:

01. "Nós precisamos reduzir **significativamente** o ofuscamento (**glare**) na recepção."

02. "A luminária (**fixture**) está piscando (**flickering**) levemente (**slightly**)."

03. "O sensor de movimento (**motion sensor**) é **extremamente** sensível."
